Raish Anwar

Bhopal, India | +91 8319313722 | raishkhan970@gmail.com | LinkedIn | GitHub

Professional Summary

SQL-focused developer with hands-on experience writing and optimizing queries, designing star-schema data models, and building SQL pipelines in BigQuery. Experienced in turning raw data into interactive reports and KPI dashboards using Power BI and DAX. Comfortable cleaning and validating data, improving data quality, and communicating insights to business stakeholders.

Technical Skills

Databases & SQL: SQL (Advanced), MySQL, PostgreSQL, SQLite, Google BigQuery

Reporting & BI: Power BI, DAX, Power Query, Tableau, Excel, Dashboard & KPI Reporting

Data Work: Data Modeling (Star Schema), ETL, Data Cleaning, EDA, Data Quality

Programming & ML: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, FastAPI, Streamlit

Cloud & Tools: Microsoft Azure, AWS, Git & GitHub

Experience

Data Analyst Intern **Jul 2025 – Dec 2025**
Unified Mentor *Remote*

- Analyzed 10,000+ mobile app records using SQL and Python to identify key factors driving installs and user engagement.
- Built a regression model to predict laptop prices, improving prediction accuracy by 25% and supporting pricing decisions.
- Developed healthcare insights dashboards that delivered 20% more actionable insights, improving stakeholder decision-making.

Projects

Real Estate Sales KPI Dashboard | SQL, Google BigQuery, Power BI, DAX | GitHub

- Designed a star schema and built scalable SQL pipelines in BigQuery for efficient data processing and reporting.
- Analyzed 10,000+ housing sales records to identify regional demand trends and price variations.
- Developed interactive Power BI reports with filters and DAX measures (YoY/MoM) to uncover key factors affecting property prices.

Banking Customer Segmentation & Cross-Selling Dashboard | Power BI, Python | GitHub

- Analyzed 3,000+ customer records across deposits, loans, and account types to uncover behavior patterns.
- Identified strong correlations (Deposits–Checking: 0.84, Savings: 0.75) enabling targeted cross-selling strategies.
- Built interactive Power BI dashboards tracking KPIs such as total deposits (3.77bn) and loans (4.38bn).

Vendor Invoice ML System | Python, Scikit-learn, SQLite, Streamlit | GitHub | Live Demo

- Extracted and cleaned invoice data from SQLite and engineered features to predict freight costs for better logistics planning.
- Built a classification model (0.86 F1-score) and deployed it with Streamlit for real-time predictions.

Customer Churn Prediction System | Python, Scikit-learn, FastAPI, Streamlit | GitHub | Live Demo

- Trained and compared multiple ML models, selecting the best based on precision-recall trade-offs (0.80–0.85 F1-score).
- Integrated a FastAPI backend with a Streamlit UI to identify at-risk customers and support retention strategies.

Education

Bachelor of Technology in Computer Science & Engineering **2020 – 2024**
Radharaman Institute of Technology and Science *Bhopal, India | CGPA: 7.77*

Certifications

- Google Data Analytics Professional Certificate – Coursera (SQL, Python, BigQuery, Tableau) [Certificate Link]
